+1 (307) 533-6181
kevin@zerogon.consulting

Full stack software developer. I love learning new frameworks and technologies. Unresolved problems echo in my mind until I find their solution.

SKILLS

Typescript, Python, Go, React, Angular, PHP, SQL, Flask, Django, Gin, FastHTTP, Express, Laravel, Wordpress, SQL, MongoDB, Linux

EXPERIENCE

Bitswift Technologies (Kingston, ON)

February 2022 – Current

Built cryptocurrency swap platform (React & Go). Created smart contract staking & bridge system on Juno Network (Rust). Built bitswift.cash blockchain explorer for Ardor network (React, Typescript & Express).

BBB Wise Giving Alliance – GiveSafely.io (Arlington, VA)

July 2023 – Current

Built the GiveSafely platform for secure transmission of donor data and the processing of cryptocurrency donations (React, Typescript & Express).

PROJECTS

PokerNow Assistant (Typescript, Python, Flask)

SaaS browser extension for collecting and analyzing player statistics. Poker math and simulation tools. Current users ~207.

PHP Crash (PHP, Laravel)

Demonstration implementation of the social gambling game "Crash" using Laravel and Reverb for real time events.

BUG BOUNTY

Bitswift (\$4,500) – API authentication bug leading to financial loss

PokerNow (\$200) – Stored XSS leading to hole card leak, account takeover.

CoinFLEX (\$600) – SMS validation bypass
